

FLEET LEDGER SOLUTIONS

# IS YOUR FLEET CARB COMPLIANT?

Most small fleets don't know they're out of compliance until the penalty letter arrives.

## WHAT NON-COMPLIANCE COSTS

- ▶ Fines reaching thousands per truck, per day
- ▶ DMV registration holds — trucks can't legally operate
- ▶ Failed inspections at weigh stations
- ▶ Lost contracts with shippers requiring CARB verification

## WHERE FLEETS GET CAUGHT

- ▶ Assuming your accountant handles CARB
- ▶ Believing trucks were "compliant when purchased"
- ▶ Missing TRUCRS reporting deadlines
- ▶ Not understanding Clean Truck Check requirements

## DOES THIS APPLY TO YOU?

- ▶ Any diesel truck over 14,000 lbs in California
- ▶ CA-based AND out-of-state fleets entering CA
- ▶ Includes reefer units (TRU regulations)
- ▶ No exemptions by fleet size — even 1 truck must comply

## WHAT COMPLIANCE REQUIREMENTS

- ▶ Annual reporting in CARB's TRUCRS system
- ▶ Clean Truck Check testing (twice yearly)
- ▶ Proper documentation and record retention
- ▶ Staying current with regulatory changes

## NOT SURE WHERE YOU STAND?

We bring enterprise-level compliance expertise to small and mid-size fleets. CARB, IFTA, fleet recordkeeping — handled.
